

Vented

BURNERS & LOGSETS

LINEAR

LINEAR VENTED BURNERS

A linear vented burner creates a long, continuous ribbon of flames that brings a clean, contemporary look to your fireplace. Unlike traditional burners that concentrate flames in one area, a linear design spreads the fire evenly across the width of the fireplace for a broader, more dramatic flame display.

Because the flame stretches across the entire burner, linear vented systems offer excellent fire visibility and a striking focal point in the room. Paired with the safety and reliability of a vented system, they deliver a modern fireplace experience that combines style, warmth, and a beautifully natural-looking flame.

FIREBOX PAIRING

Our vented gas log sets are the perfect complement to the Aspen Firebox Series, designed to fit beautifully and perform seamlessly together. When paired, they create a complete fireplace solution that delivers realistic flames, reliable warmth, and the clean, built-in look that makes the Aspen firebox a standout in any room.

SAND PAN

SAND PAN VENTED BURNERS

Sand Pan burners deliver the rich, natural ambiance of a real wood fire — without the hassle of hauling logs or maintaining the flame. A single-burner system uses one burner to produce a single flame pattern beneath the logs, offering a simple and cost-effective fire presentation. A double-burner system uses two burners—typically one in the rear for taller flames and one in the front for glowing embers—creating greater depth and a more realistic wood-fire appearance.

ELITE RADIANT

ELITE RADIANT VENTED BURNERS

The Elite Radiant burners' unique construction and integrated radiant fiber heat sink produce dancing flames without the mess of sand or vermiculite.

Feel more heat radiate back into your room, use less fuel than a standard vented burner, with less hassle than a wood-burning unit.

Empire Hearth Vented Log Sets are the perfect complement to the Blackburn Firebox Series, delivering efficient warmth and timeless style. For full details, features, and specifications, please refer to the Empire Hearth Blackburn brochure.

SLOPE GLAZE

SLOPE GLAZE BURNERS

A vented gas log set makes a great alternative to the hassle of building a log fire in your wood-burning fireplace. Just like a wood fire, a vented gas log set provides plenty of mesmerizing flames and flickering light. Vented log sets are considered decorative systems and must be installed in a vented fireplace with the damper open and may not operate by thermostat.
