CLEAN FACE DIRECT-VENT

TAHOE

CLEAN-FACE FIREPLACE COLLECTION

Tahoe Clean-Face fireplaces are designed to do more than warm a room—they transform it. With captivating flames, beautiful hand-painted logs or contemporary rock sets, and a range of liners and configurations, each model makes it easy to create a fireplace that feels tailored to your home and style. Whether you want a timeless focal point, a sleek modern statement, or a dramatic multi-sided centerpiece, the Tahoe collection offers sizes and designs to fit your space beautifully. Thoughtful features like expansive viewing areas, clean-face installation, and modern gas convenience give you the look you love with the performance and ease you want. The result is lasting comfort, elevated design, and a fireplace you'll enjoy every day.

DELUXE CLEAN-FACE TRADITIONAL MODELS

Deluxe models feature our Contour tube-style burner, designed to complement the hand-painted ceramic fiber log set, and produce a natural dancing flame.

Clean-Face systems are designed for in-wall installation. Tile or other non-combustible material may be used to conceal the outer edge of the fireplace to provide a true built-in appearance.

Deluxe Clean-Face models are offered in Millivolt and Intermittent Pilot

PREMIUM CLEAN-FACE CONTEMPORARY MODELS

The Premium Clean-Face Tahoe includes a tempered glass view window and a unique burner that delivers a rich flame pattern. The ceramic fiber rock set is required (but sold separately).

Each rock piece is hand painted.

The contemporary fireplace includes a deep black polished porcelain-steel liner to enhance the reflected flames.

SEE-THROUGH MODEL**

A GREAT VIEW FROM ANY ANGLE

Both Peninsula and See-through models feature an attractive clean-face design that integrates the barrier screens into the fireplace – flush with the fireplace face – allowing you to install tile, brick, or other non-combustible materials right up to the fireplace opening.

Choose between the hand-painted Campfire Logs or Mixed Logs and Stones to customize your fireplace. Both multi-sided fireplaces are rated at 34,000 Btu (Nat) / 34,000 Btu (LP), and include non-combustible board for installation above the fireplace. Additional non-combustible materials may be required. See installation manual.

LUXURY CLEAN-FACE MODELS

With its large ceramic glass window and clean-face design, this luxury direct-vent fireplace creates the illusion of a site-built fireplace, but offers the convenience and operating efficiency of a modern gas system. The traditional luxury clean-face fireplace is available in 36-inch and 42-inch models. The available blower helps circulate warm air more quickly and is controlled by a convenient multi-function remote.

Designed for in-wall installation, our luxury clean-face models require just over 22 inches of depth. The venting connects to the top of the fireplace, but can run out the wall or up through the roof. Tile or other noncombustible material may be used to conceal the outer edge of the fireplace to create a true built-in system.

These direct-vent fireplaces draw in fresh outside air to support combustion and exhaust combustion by-products to the outdoors. The 5 x 8 vent-within-a-vent isolates the incoming fresh air from the exhaust, yet still requires just a single hole through the wall or roof.

A fireplace barrier screen is included to help protect you and your family from inadvertently touching the hot glass.
