STOKER STOVES

MODEL 608 STOKER STOVE

The Hitzer Model 608 Stoker Stove is one of the most efficient and technologically advanced stoves on the market today. As a HPBA Vesta Award Finalist, this stove has the credibility, intuition, and capabilities that exceed your expectations and needs.

With the technology of the Coal-trol Digital™ thermostat combined with the intuition of the Stoker, this stove will maintain the exact temperature your Coal-trol is set at. A digital thermostat requires no labor, and this stove can be operated with a power vent, meaning it doesn't require a chimney.

MODEL 710 STOKER FURNACE

The Hitzer Model 710 Stoker Furnace is great for the user that wants a hands-off stove. It has the ability to be operated by both a power vent or a traditional class A chimney.

With its integrated Coal-Trol Digital™ control system, you have precise push button temperature control for constant even heat. It has a day/night set back, and constantly monitors room temperature while adjusting the fuel feed rate to maintain the set temperature. The catch phrase for this control is "Cruise Control for Your Coal Stove", meaning you have constant control of your feed rate.

ACCESSORIES

POWER VENT

- An optional, innovative exhaust system that can be utilized in place of a traditional chimney application.

HOT WATER COILS

- Both small and large sizes available
