

Nostalgia meets Modern Design With the Classic 4 Cookstove!

Cooking with a wood fired oven is an art that seems lost, yet is here today with the HWAM Classic 4 EPA Exempt Cookstove! HWAM has married this centuries old way of cooking to a stove with futuristic design, giving you the best of both worlds!

Start cooking today, with the Classic 4 Cookstove!

HWAM Classic 4

Featuring the HWAM Autopilot™

Brilliant solutions often arise from the simplest of ideas and HWAM's patented automatic system is no exception to this rule. It consists of a small bi-metallic coil which automatically regulates the supply of air to the combustion. A strikingly simple, yet ingeniously brilliant function which offers numerous automatic benefits – both for you and for the environment.

HWAM Autopilot™

What it does

The HWAM Autopilot™ controls the three sources of combustion air supply to maximize heat output and efficiency while minimizing harmful emissions.

Benefits

Cleaner combustion – 20% less Carbon Monoxide

- Less impact on the environment and your health

More efficient combustion – up to 30% more efficient

- More heat for your money
- Less wood burned
- Less heat up the chimney – 40% less!

Less soot in the chimney and appliance

- Better fire safety
- Less cleaning and maintenance

Easy operation

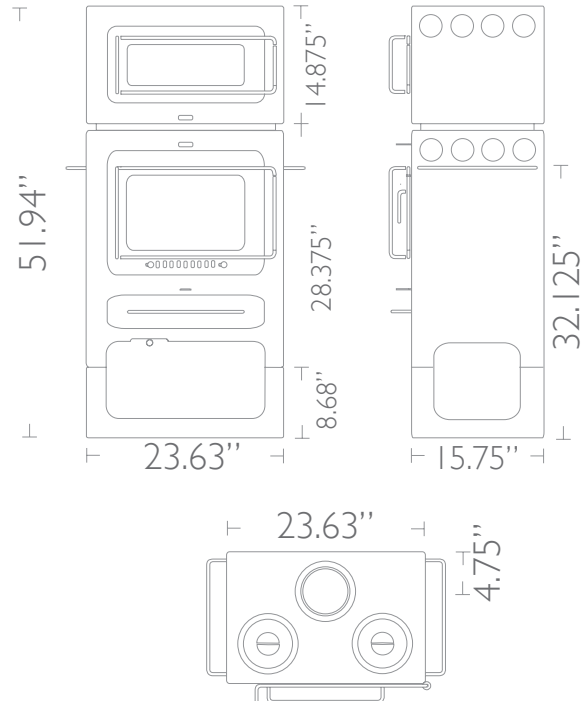

- No need to adjust a control during operation, just, “Set it and forget it.”

How it works

The thermostatic spring moves the control arm, which regulates the 3 sources of combustion air to maintain a constant temperature in the combustion chamber.
